

## PHYSICAL SURVEILLANCE

An investigation was initiated in July of 2016 in an effort to observe the activity of improper sillage disposal.

### Surveillance by Land

- Positions maintained on NJ and NY side of Hudson River
- Distinct smell of sewage noted
- Black hose observed hanging off the back of a vessel
- Activity between docks and on backs of vessels could not be observed

### Surveillance by Boat

- Positions maintained in Hudson River and on land
- 2 vessels observed with illegal sillage and/or oil disposal
- Water in vicinity appeared to be polluted
- An employee with a cart was observed during and after improper disposal of sillage and/or oil was observed
